

National Palliative Care Week
21–27 May

Matters of  and death

“It could be **years**,
it could be **months**,
it could be **days**.”

Sarah

Palliative Care
Volunteer

Early referral for quality of life.

People of all ages can access palliative care – those living with a range of illnesses including dementia, heart and kidney disease, cancer, and many more.

Early referral means better symptom, emotional, and social support.

**How can palliative care support your work and life?
Start the conversation today.**
