--------------	-------------------	----------------	---------------	----------------

Shaping the Future of Paediatric Palliative Care Project

- Structured communication training to initiate difficult conversations with empathy and compassion.
- Paediatric Palliative Care Clinical Guidelines to support best practice and holistic care.
- Optimum Transition Pathway between paediatric and adult palliative care services.
- Strategies that overcome barriers and improve timely referral to paediatric palliative care.

- All health and care professionals
- Volunteers
- Service providers
- Policy makers
- Government
- General public

- Paediatric palliative care

- Toolkits
- Educational resources
- Videos
- Webinars
- Fact sheets
- Self-care resources
- Diverse population support

The QuoCCA Project

- Paediatric palliative care education to health and education professionals and communities in urban, regional and remote areas.

- GPs
- Allied health professionals
- Care workers
- Nurses
- General public

- Psychosocial care
- Personalised, compassionate care.
- Inclusive care
- paediatric palliative care

- In person education sessions
- Online webinars
- Online modules

The caring@home Project

- Access to quality and timely end-of-life care for patients who choose to be cared for, and die at home, if possible.
- Nationally consistent, practical and evidence-based clinical resources and education to support proactive end-of-life care planning with families and carers and to support families and carers to help manage end-of-life symptoms at home.

- Health professionals
- GPs
- Allied health professionals
- Clinical services
- Nurses
- Carers and families

- Psychosocial care
- Personalised, compassionate care.
- Inclusive care

- Workshops
- Online webinars
- Factsheets
